As a junior backend developer specializing in Node.js, I am enthusiastic about applying my foundational skills to create efficient and scalable server-side solutions. Despite being in the early stages of my career, I have already gained exposure to developing APIs, utilizing databases, and implementing backend functionality using Node.js. I have a solid understanding of JavaScript fundamentals and am eager to learn more about best practices and advanced techniques in backend development. I approach challenges with a growth mindset, constantly seeking opportunities to expand my knowledge and refine my skills. As a junior developer, I value collaboration and mentorship, as they provide invaluable learning experiences. With my passion for Node.js and my determination to continuously improve, I am excited to contribute to projects that will allow me to grow and make a positive impact as a junior backend developer.

Skills

Languages	Javascript, Typescript, C, C++
Database	TypeOrm, MySQL, MongoDB, MariaDB, NoSQL firebase
Tools/Framework	nodeJs, NestJs, Docker, Git.
Communication	English , French, Arabic.

Projects

MY NODEFARM
My-nodefarm is a streamlined project that combines an HTML template with Node.js to create a user-friendly platform for managing farming operations. With its simplicity and efficiency, this project helps farmers optimize their tasks and improve productivity.

Natours
Natours is a modern tour booking site powered by Node.js, Express, MongoDB, and Mongoose. This project offers a user-friendly platform for exploring and booking exciting tours.

Task Management
The Task Management App API is a robust and user-friendly solution for integrating task management functionality into your applications. With features like task creation, updates, tracking, and status monitoring, this API simplifies project management and enhances productivity.

Certifications

Node.js, Express, MongoDB More: The Complete Bootcamp 2022   December 2022
